

MAXIMIZE YOUR ONESIGN® INVESTMENT

TRAINING AND CERTIFICATION - EUROPE AND THE MIDDLE EAST

Imprivata offers OneSign Training and Certification courses to help maximize your OneSign investment. These courses provide students with the knowledge they need to get the most benefit from Imprivata's solutions and to ensure a rapid and effective deployment strategy. Training includes:

- Lecture-based training
- Instructor demonstrations
- Participant guide
- Hands-on exercises
- Quizzes and tests for certification

By participating in a session students can:

- React with confidence to changes in their application environment
- Improve ability to support installation with little or no external service expenses
- Be introduced to new product features to benefit the organization.

ACCELERATED TRAINING AND CERTIFICATION

The Imprivata OneSign training is broken into two parts: a 2-day self paced program, followed by a qualifying test for the second half of the course, and 2-days of instructor led training.

The first segment consists of offline training on user importing and management, authentication methods, policies, reporting and auditing.

The on-site segment includes several hands-on workshops and demos. Students are provided with best practice examples based on hundreds of customer deployments. Specifically, students will gain exposure to:

- User Importing and Management
- Authentication Methods and Policies
- Reporting and Alerting
- Application Profiling Concepts
- Testing and Troubleshooting Application Profiles
- Deployment Strategies for Application Profiles
- Advanced Application Techniques

Post the on-site training segment, students must complete a OneSign certification test within 2 weeks of the original classroom training to receive official certification.

Contact your local territory manager for course pricing or go to http://www.imprivata.com/onesign_training.

See back of sheet for course outlines...

ACCELERATED CERTIFICATION COURSE OUTLINE
