# Stronger together – Cloud Solutions Intelligence (formerly FairWarning) and Salesforce Shield

Level up your user activity monitoring with the power of Imprivata and Salesforce.

Imprivata Cloud Solutions Intelligence (formerly FairWarning) combined with Salesforce Shield, provides users with an enterprise-grade solution, designed for security teams to utilize as a full user activity monitoring program. By combining Salesforce Shield and Cloud Solutions Intelligence (CSI), customers will have all areas within their user activity monitoring program covered.

Program area	Feature	Layer 1 – Salesforce Shield	Layer 2 – Imprivata CSI
<b>Data</b>	Data Visualization	Provides data visualization	Full data visualization to eliminate manual log file parsing
	Data Translation and Correlation	Limited features for data translation and correlation	Translates raw log files into easy to read, actionable insights
	Data Retention	30 days of data retention	Retention of data for as long as needed, can be multiple years
	Data Limit by Record Count	50 million row data limit	Unlimited data by record count
<b>User Activity Monitoring</b>	Supporting of hourly and real-time feeds	Limited abilities for user activity monitoring use cases and proactive alerts and behavioral analytics. Does not support hourly and real time feeds or investigation management	Fully supports all event monitoring logs and real time streams. Allows for user activity monitoring features such as abnormal access to objects, permission set changes, and data exfiltration
	User Activity Monitoring Use Cases		
	Proactive Alerts and Behavioral Analytics		
	Investigation Management		

Program area	Feature	Layer 1 – Salesforce Shield	Layer 2 – Imprivata CSI
<b>Governance</b>	Fully supporting regulatory compliance requirements	Does not help to support regulatory compliance requirements	Fully supports regulatory compliance with the ability to automate compliance processes and provide transparency into data access
<b>Application Coverage</b>	Supporting multiple SaaS applications	Does support Salesforce SaaS applications	Supports 400+ applications
	Multi-Organization support	Single-organization support	Provides multi-organization support

CSI provides an easier way to monitor user activity, parsing through log files in the background, and transforming data into actionable alerts. With the ability to automate forensic investigations and out of the box reporting capabilities, time can be saved, and risk can be acted upon faster. Salesforce Shield and CSI users will be able to have a holistic user activity management program.

Imprivata is the digital identity company for mission- and life-critical industries, redefining how organizations solve complex workflow, security, and compliance challenges with solutions that protect critical data and applications without workflow disruption. Its platform of interoperable identity, authentication, and access management solutions enables organizations in over 45 countries to fully manage and secure all enterprise and third-party digital identities by establishing trust between people, technology, and information.
