

# Imprivata onsite training technical and logistical requirements

## TECHNICAL REQUIREMENTS

1. Access and Power
  - a. Internet access for instructor and students, wireless access to Imprivata training router to access virtual machines
  - b. Power for all laptops and instructor router
2. Hardware
  - a. Each student must have access to a Windows laptop or desktop that does not have any Group Policy Objects restricting the installation of software or web access
  - b. Each student must have local administrator privileges on their computers for the installation of the Imprivata Agent and .NET Framework 3.5 (if using Windows 10)
  - c. Authentication Devices such as proximity card readers or fingerprint readers (if available for each student)
3. Software
  - a. Windows Operating System with version 8.x or higher
  - b. Internet Explorer Browser with minimum version 9, no higher than 11
  - c. Imprivata Agent (provided by instructor) to be installed by students on their computers to complete the labs
  - d. Lab software (provided by instructor) for the Application Profiling portion of the course

## LOGISTICAL REQUIREMENTS

4. Training Room for students and instructor
5. Projector or Large Monitor with HDMI / VGA cable to display presentations, demonstrations and labs
6. White Dry Erase Board or Flip Chart with markers

## ONSITE CLASSROOM INFRASTRUCTURE

7. Students access an ESXi virtual server provided by the instructor containing three Imprivata appliances for each student
8. Instructor provides a Wi-Fi enabled router onsite that will connect, via a network cable, to the ESXi server
9. Students using a Wi-Fi enabled desktop or laptop, connect to the Wi-Fi enabled router accessing the Imprivata appliances on the instructors ESXi server (Note: students do not need internet access, only access to the trainer router)
