What's required

- Requires Apple iOS
- If you do not have Dragon Medical One, contact your Nuance Account Executive or call 877-805-5902 for more information

Imprivata Cortext® is the secure communications platform for healthcare that facilitates care coordination by allowing physicians, nurses, and patients to connect, communicate, and collaborate securely from any workstation or mobile device.

With access to clinical speech recognition by Nuance®, Imprivata customers can reap the productivity and financial benefits of cloud-based Dragon® Medical – a secure, industry-leading medical speech recognition platform all from within Imprivata Cortext.

With a speaker-adaptive engine that allows users to talk naturally and at their own pace, built-in visualization and feedback, voice navigation and correction capabilities, and anytime, anywhere access, you can rest assured that clinical information is accurate and up to date.

By leveraging Nuance Dragon® Medical embedded in Imprivata Cortext, you can further improve operating efficiencies, increase physician productivity and satisfaction, and raise the overall quality of patient care.

Speech recognition accuracy and data security is extremely important to Nuance and its healthcare clients

Integration features

Designed for healthcare: Speech recognition accuracy and data security is extremely important to Nuance and its healthcare clients. As such, it is critical that healthcare clients choose the appropriate Nuance solution – with medical vocabularies, specialty language models, workflow compatibility, clinical feature sets, and business associate agreements – to support clinical documentation and other healthcare workflows with the appropriate technology, security, privacy policies, and procedures in place.

3-5x faster than typing: The average doctor types 40 words per minute (WPM), Dragon Medical allows them to dictate more than 150 WPM.

Robust medical vocabulary: Cloud-based speech means you'll always have access to the latest medical dictionary, terms, phrases, and clinical formatting rules. Organizations and individual users can also customize their personal medical vocabularies.

Continuity of clinician experience: The same personalized experience is consistent as clinicians move between the desktop, web, and mobile devices, and across the EHR and mobile productivity apps.

Speak at your own pace: Speak naturally without having to wait for recognized text to appear on screen or navigation commands to be recognized using SpeakAhead™ technology.

Visualization and feedback: Visual indicators tell you where speech is enabled and when audio is being captured, and displays audio recording levels to ensure a seamless experience.

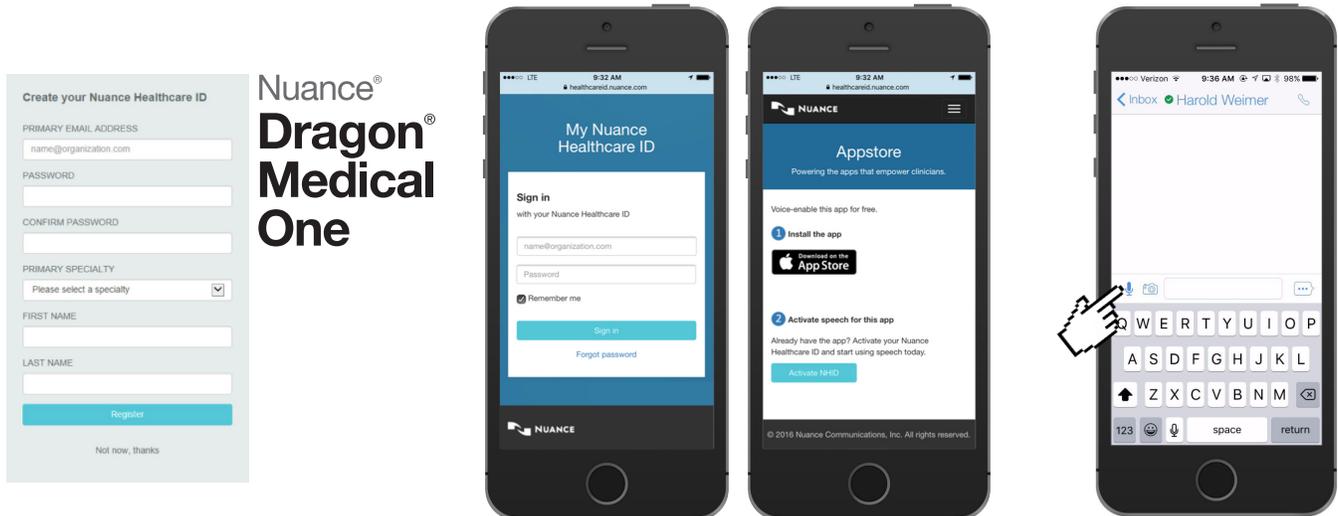

Features doctors rely on: Dragon Medical offers secure, professional-grade, features like Auto-texts, custom vocabularies, voice correction capabilities, no usage limits, and more.

- Highly accurate, responsive, and HIPAA-compliant clinical speech recognition – available over 3G, LTE, and Wi-Fi
- No voice profile training required – automatic accent detection, microphone calibration, and a single speech profile that continues to adapt and improve over time
- Access to a robust medical vocabulary and personal content, including Auto-texts, custom words and phrases, voice correction capabilities, and more

Easy to use speech recognition

Activate Dragon Medical in three easy steps

Step 1: Register your Nuance Healthcare ID through the Dragon Medical One Desktop Application*

*One-time process; requires Dragon Medical One license

Step 2: Find Imprivata Cortex via the My Nuance Healthcare ID Website and activate your profile from the desktop or mobile device

Step 3: Next time you open Imprivata Cortex you will have secure access to your Dragon Medical speech profile and personalized voice experience

About Imprivata

Imprivata, the healthcare IT security company, enables healthcare securely by establishing trust between people, technology, and information to address critical compliance and security challenges while improving productivity and the patient experience.
