Imprivata managed supervised enrollment training program

Maximum participants: Up to eight participants.

Audience: Imprivata Administrator, Clinician/Provider Power-User, Enrollment Supervisor

Format: Hybrid delivery of eLearning, online training, and remote services.

Length: 2 hours–virtual instruction and 4 hours–remote Implementation Engineers services.

Overview

Imprivata managed supervised enrollment training is our remote, engineer-led program specifically geared towards healthcare systems with geographically diverse teams. It provides the knowledge needed to make educated choices in preparing providers and enrollment supervisors to remotely enroll in Imprivata Confirm ID for the electronic prescribing of controlled substances (EPCS). Developed for up to eight participants, consisting of two hours of virtual instruction and four hours of remote implementation services will be used to validate technologies for virtual EPCS enrollment. You will validate and deploy appropriate policies and workflows for varying usage of authentication devices by dispersed providers. Test video conferencing environments to seamlessly enroll compliant authentication modalities remotely for EPCS.

Agenda

Topics	
• Review and test Imprivata enviroment	• Validate authentication devices for remote providers
• Configure policies and workflows for remote enrolling	• Supervised enrollment testing and validation
• Review and test video conferencing enviroment	• Enrollment Reporting

Imprivata Learning Center

As part of the Imprivata blended learning approach all registered class participants are granted access to the Imprivata Learning Center for one year.

Cost and registration
