

Enhance Dropbox security, usage, performance, and compliance with proactive, simplified insights

Grow a culture of trust with Imprivata FairWarning for Cloud Solutions

For organizations of all sizes and types, sensitive data is propagating in more places than ever before. This includes the cloud environment. For Dropbox, sensitive data can lie in documents, files, photos, and more. And since many industries like finance and insurance have security regulations that require you to monitor data access, you'll need a tool that monitors Dropbox and other applications.

You can get total visibility into which users are handling which data, where, and when by using Imprivata FairWarning for Cloud Solutions to monitor your Dropbox audit logs and deliver proactive alerts on suspicious or abnormal activity.

How are organizations using Imprivata FairWarning for Cloud Solutions to strengthen security, compliance, and performance by monitoring user activity in Dropbox?

INFORMATION SECURITY
