HP and Imprivata single sign-on

Your front-end security solution for fast authentication and single sign-on

Get speedy, secure access inside and outside your care facility

HP and Imprivata give you highly secure access to patient information while saving you valuable time every day. Using HP Thin Clients and Imprivata OneSign®, doctors, nurses and clinicians are freed from remembering and typing passwords when accessing data at multiple locations. Whether at a nurses' station, physician's office or patient's room, authorized staff can automatically and quickly access data, and spend more time caring for patients.

Leadership you can trust

HP is a leading WW technology provider

Imprivata is #1 WW market leader in healthcare IT security.

- Imprivata OneSign® is used in more than 1,300 hospitals and by more than two million clinical users daily.

- Imprivata is a trusted provider for authentication and single sign-on by leading healthcare analysts and has received top ratings from Gartner, KLAS, HIMSS, and is exclusively endorsed by the American Healthcare Association.

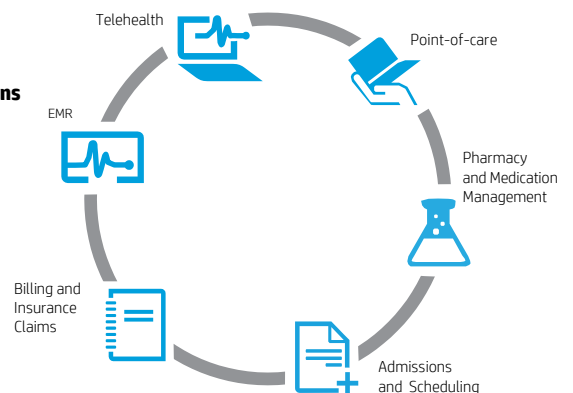

Why HP Thin Clients for Healthcare

With HP Thin Clients, your healthcare professionals can access the tools and information they need—regardless of the device they are using. By simply logging on to a virtual desktop, user applications and patient records can be securely accessed allowing greater mobility of caregivers and reducing cumbersome workflows.

HP Thin Clients and virtualization allow you to easily access sensitive information, anywhere, in a secure manner.

- HP Thin Clients simplify access to systems by adding single sign-on and authentication capabilities from Imprivata. Proximity cards provide easy clinician authentication.
- HP Thin Clients assist with privacy requirements. Secure USB, built-in firewall, proximity card authentication, and other HP security innovations help you protect data and assist in complying with HIPAA and other regulatory mandates.
- Get fast, flexible access via secure roaming. HP Thin Clients allow users to keep roaming sessions active between locations and devices.

HP provides end-to-end solutions for Healthcare applications:

As simple as using your security badge

The Imprivata Suite

- Imprivata No Click Access™ streamlines user access to their virtual desktop and applications from any HP Thin Client with a simple tap of an ID badge or a fingertip
- Imprivata OneSign® Authentication and Single Sign-On simplifies end point and application login and logout by automating username and password entry. OneSign centrally manages password policies, password changes, and auditing from a simple to install appliance
- Imprivata Virtual Desktop Access™ is integrated with HP Thin and Zero Clients to enable desktop roaming with the tap of a badge or swipe of a fingertip
- Imprivata OneSign® Self-Service Password Reset lets users reset domain passwords without calling IT
- Imprivata OneSign Secure Walk-Away® automatically locks a thin client when a user leaves and re-authenticates them on return

In most healthcare settings, users already carry an ID badge to access the building. Now you can use this same badge to provide strong user authentication to quickly access information from your healthcare IT systems. After an initial login with a PIN or password, the badge can be tapped to a card reader at secure endpoints where the user needs access, removing the requirement for multiple passwords, lengthy login processes, and the many clicks required to sign in to desktops and applications.

Users gain streamlined access to their virtual desktop and their applications from any HP Thin Client endpoint by simply tapping their ID badge or swiping their fingerprint as they move from one station to the next. The virtual desktop follows the user throughout the day.

Imprivata OneSign® provides a comprehensive set of features that help you streamline and secure user access to privileged health information, simplified with centrally managed authentication and access policies across your entire organization.

Imprivata OneSign® is compatible with the following HP Thin Client devices.

HP Thin Client portfolio

Healthcare environments have a special set of IT requirements. Products must be reliable, secure, responsive, serviceable, ready for integration with other hospital systems, and offered with long product life-cycles. HP Thin Clients help you meet these requirements. Offering a complete desktop and mobile line HP Thin Clients deliver the proven performance, high reliability, security, and easy serviceability required for your healthcare environment. From point-of-care to telemedicine to electronic medical records (EMR) systems, HP Thin Clients are a natural fit for your healthcare environment.

HP Zero Clients

HP Zero Clients are designed exclusively for high performance PCoIP-VMware and Amazon Workspace. The HP t310 All-in-One Zero Client is the all-in-one for virtual workspaces, saving time and money by connecting users to VMware networks in no time. The HP t310 Zero Client is built for performance, security, and zero maintenance with hardware based PCoIP. With no local storage or operating system, you get top data security and a worry-free zero maintenance device.

HP Smart Zero Clients

The HP t240 is a compact entry level and versatile thin client that is cost-effective and gets the job done in virtualized or cloud-based environments.

HP Flexible Thin Clients

The HP t540, t640, t740, t638 Thin Clients deliver a flexible alternative to a PC or Workstation without sacrificing performance capabilities. You get simple setup, powerful performance, enhanced security, expansion options, and a rich multimedia experience.

The t540 provides a simple, secure virtual desktop solution.

The HP t640 delivers a highly secure thin client optimized for workplace productivity. The HP t740 is the most powerful thin client which delivers secure, powerhouse performance to your graphics-intensive virtual, cloud and local computing environments while supporting up to 6 4k displays.

HP Mobile Thin Clients

The HP mt22, mt32, and mt46 Mobile Thin Clients deliver thin, light mobility with reliable security, efficient manageability and convenient accessibility. Pre-installed HP Velocity software gives you a rich virtualization experience by finding and fixing network bottlenecks in real time. The result is smoother video and clearer audio, reduced application lag and faster file transfers. The HP mt22 has essential performance features for daily multi-tasking, trusted security, and a sleek durable aesthetic.

The HP mt32 is ultra-light with multi-layered security coupled with long battery life, reliable connectivity, and powerful processing ensures virtual productivity from anywhere.

The HP mt46 delivers premium experiences with comfortable design, reliable enterprise security and serviceability, and productive connectivity.
