Overview

Imprivata FairWarning Ready Patient Privacy Intelligence Master Certification Training was created in response to customer demand for building a legally defensible patient privacy program. This program was developed for people just like you who want to advance their knowledge of the Imprivata FairWarning Patient Privacy Intelligence platform and elevate their career. This in-person training is a comprehensive program focused on raising the bar of the privacy, security, and regulatory compliance expertise across your organization.

Attendees who successfully complete all course requirements including passing the certification exam will earn FairWarning Certified Master status, valid for two years.

Program Benefits

- Learn how to create high access reports and what to look for while evaluating the results
- Discover key events that reveal your high-risk users and expedite your investigations
- Identify audit source challenges to combat security risks around access privileges
- How to prepare for a potential battle in court using data captured by FairWarning
- Hear lessons learned from past experiences by your peers
- Identify the business drivers shaping the future of healthcare privacy and security
- Apply experience in forensics investigation and eDiscovery to advanced training in the Platform
- Leverage Governance reporting to help improve operations in day-to-day activities of providing patient care, practice management and administration

Imprivata Learning Center

As part of the Imprivata blended learning approach all registered class participants obtain access to the Imprivata Learning Center consisting of self-paced eLearning courses for one year.
