

# Imprivata Confirm ID for Epic

Fast convenient authentication for electronic prescribing of controlled substances and other signing contexts within EpicCare

Imprivata Confirm ID™ is a comprehensive identity and multifactor authentication platform that integrates seamlessly with EpicCare to deliver fast, secure, and consistent user authentication across all signing contexts.

To deliver safe, effective, and compliant patient care, providers are often required to authenticate clinical transactions such as electronic prescribing of controlled substances (EPCS), anesthesia user verification, medication administration, wasting, and blood administration, among others. However, adding a layer of security introduces potential inefficiencies that can frustrate providers and impede patient care.

Imprivata Confirm ID transforms these clinical workflows by replacing manual entry of Epic passwords with fast, automated authentication. Leveraging the fifth-generation Imprivata Connector for Epic, Imprivata Confirm ID helps organizations optimize their EpicCare implementation, drive user adoption, and improve clinical workflow efficiency.

## Key facts

- Seamless integration with EpicCare delivers consistent authentication workflows across all signing contexts
- Improve clinical efficiency by replacing manual entry of Epic passwords with fast, secure authentication
- Optimize Epic workflows by removing barriers to adoption with innovative, convenient, and
- DEA-compliant authentication methods

## Comprehensive solution for EPCS

Imprivata Confirm ID is an end-to-end solution for meeting the DEA requirements for EPCS, including provider identity proofing, supervised enrollment of credentials, two-factor authentication, and auditing and reporting. Imprivata Confirm ID offers tight integration with EpicCare and supports the most comprehensive set of innovative, convenient, and DEA- compliant two-factor authentication methods to give providers a fast and efficient EPCS workflow.

By giving providers a single, efficient, and consistent e-prescribing workflow for all medications, Imprivata Confirm ID drives EPCS adoption to meet Meaningful Use criteria and helps organizations realize the substantial benefits of EPCS, including increased provider productivity and improved patient safety and satisfaction.

## Fast, secure signing contexts

In addition to EPCS, Imprivata Confirm ID enables fast, secure authentication for more than 40 other signing contexts within Epic by replacing manual entry of passwords with more convenient authentication methods. This gives providers a consistent, seamless authentication workflow while creating a robust audit trail for all transactions with patient health information. Supported workflows within Epic include:

- **Anesthesia attestation** – Imprivata Confirm ID allows anesthesiologists to tap their badge when attestation signing. This saves time and improves efficiency as anesthesiologists move quickly from room to room.
- **Medication administration record** – With Imprivata Confirm ID, nurses and other care providers can quickly and efficiently authenticate to witness the administration of high-risk medications to patients. Instead of manually entering their Epic username and password – which takes time, breaks concentration, and potentially impedes care delivery – providers can simply tap a badge or swipe a fingerprint. This ensures witnessing policies are met while maintaining clinical workflow efficiency.
- **Break-the-glass** – In code situations or other emergencies, Imprivata Confirm ID gives providers a fast, efficient authentication option when they need to override their assigned privileges to access patient records, order emergency medications, and/or complete different transactions. Instead of having to remember and manually enter a password while under duress, providers can simply tap a badge or use another convenient option to authenticate to break the glass.

“Imprivata Confirm ID integrates seamlessly with EpicCare to enable fast, efficient authentication for critical clinical workflows such as EPCS. This helps unlock the full potential of EpicCare by allowing our providers to quickly and easily transact with electronic health information and deliver high-quality patient care.”

Martin Littmann, CTO & CISO,  
Kelsey-Seybold Clinic

## Fastest, most convenient authentication solutions

Imprivata Confirm ID offers the broadest range of convenient, innovative, and DEA-compliant authentication options to best meet various clinical workflow requirements. Providers are only prompted for authentication methods that are available and allowed, which streamlines signing and improves efficiency. Supported authentication options include:

Workflow	Supported authentication methods						
	Hands free Authentication	Push token	Fingerprint	Soft token	Hard token	Badge	Password
							
EPCS	✓	✓	✓	✓	✓		✓
Other signing contexts	✓	✓	✓	✓	✓	✓	✓

## Industry-leading connector for Epic

As an Epic-approved third-party solution, Imprivata leverages Epic's authentication APIs to tightly integrate Imprivata Confirm ID with EpicCare to offer care providers a consistent, high-quality user experience when they log in or out, and sign documentation for encounters, orders, or prescriptions within Epic. The seamless integration also allows organizations to implement Imprivata Confirm ID quickly and easily. The Imprivata Connector for Epic also supports signing workflows in both LDAP and non-LDAP Epic deployments, giving customers the flexibility to leverage Imprivata Confirm ID within the infrastructure that best fits their environment. Imprivata Confirm ID supports EpicCare 2010, 2012, 2014, and 2015.

**Imprivata Confirm ID is a comprehensive identity and multifactor authentication platform for remote access and clinical authentication workflows across the healthcare enterprise.**

## Comprehensive auditing and reporting

Imprivata Confirm ID offers detailed reporting capabilities to establish a secure, auditable chain of trust for EPCS and other clinical authentication workflows. Imprivata Confirm ID gives organizations better visibility into how, when, and where providers interact with patient health information to safeguard PHI and meet regulatory compliance requirements. Comprehensive reporting tools document the credential enrollment process and user authentication, storing the data in a centralized location for simplified compliance reporting.

## Imprivata Confirm ID: The comprehensive identity and two-factor authentication platform for healthcare

Imprivata Confirm ID is a comprehensive identity and multifactor authentication platform for fast, secure authentication workflows across the healthcare enterprise. Imprivata Confirm ID makes security invisible by offering a broad range of innovative, convenient, and DEA-compliant authentication methods, including Hands Free Authentication, push token notification, and fingerprint biometrics. Imprivata Confirm ID combines security and convenience by enabling fast, secure authentication across enterprise workflows while creating a secure, auditable chain of trust wherever, whenever, and however users interact with patient records and other sensitive data.
