

# Application integrations: Imprivata Identity Governance Connectors

Imprivata Identity Governance integrates with the applications integral to healthcare delivery organizations. Imprivata Bridge Studio software allows organizations to build identity management connectors into clinical and business applications in a self-service way, bringing automated application provisioning and management within reach of mid-size to large hospital IT staffs. With Imprivata Bridge Studio, administrators can seamlessly create application connectors into any type of application with a wizard-like drag and drop interface.

In addition to Imprivata Bridge Studio, the extensive Imprivata identity and access management library of clinical and non-clinical applications allows for a quick start in integrating with a variety of applications from vendors such as Epic, Cerner, Allscripts, and GE Healthcare.

Imprivata Identity Governance also integrates with Imprivata OneSign, Imprivata Confirm ID, and Imprivata Privileged Access Management to create a broader identity and access management platform purpose-built for healthcare.

## Identity Governance Application Connectors

The following is a sample list of connectors that have been developed by the Imprivata services team for Imprivata Identity Governance.

Application vendor	Application name	Application vendor	Application name
Allscripts	SCM	Epic	Hyperspace
Cerner	Millennium	GE	Centricity EMR
Cornerstone	LMS	GE	Centricity Perinatal
Cherwell	Ticketing System	GE	Centricity Portal
Eclipsys	AMPFM Web	Hillrom	Voalte
Entrust	Identity Enterprise Web App	Hyland	Onbase
Epic	Hyperdrive	IBM	Lotus Notes

<b>Application vendor</b>	<b>Application name</b>
IMPAC	Mosaiq
Imprivata	Confirm ID
Imprivata	OneSign
Imprivata	Privileged Access Management
Lawson	Financial
Lawson	HR
Lawson	Materials Management
McKesson	ConnectRx
McKesson	Horizon Meds Manager
McKesson	Horizon Physician Portal
McKesson	Horizon Patient Folder (HPF)
McKesson	OneContent Web
McKesson	STAR Nav
McKesson	HOM
Meditech	Expanse
Meditech	Client Server

<b>Application vendor</b>	<b>Application name</b>
Meditech	Magic
Medplus	ChartMaxx
Microsoft	Active Directory
Microsoft	Azure AD
Microsoft	Exchange
Microsoft	Office365
Microsoft	Skype for Business
PDC	IDenticard PremiSys
PeopleSoft	PeopleSoft FIN
PeopleSoft	PeopleSoft HR
Philips	iSite
ResMed	MatrixCare
ServiceNOW	CSM
Siemens	Invision
Siemens	MedAdmin
Siemens	MedSeries4

Application vendor	Application name	Application vendor	Application name
Siemens	Physician Portal	TrueNorth	MiSys
Siemens	Soarian	Twilio	Twilio Notifications *add on
Siemens	Syngo.via	Ultimate Software	UltiPro
Sunquest	SunquestLAB	Workday	HRM

## Bridge developer studio

The Imprivata Bridge Studio developer environment is a visual environment for creating and maintaining automated provisioning workflows.

The provisioning workflows that can be crafted as a part of the development environment include:

- Creation
- Modification
- Deletion
- Password reset
- Archival
- Suspension
- Activation

## Wizard features

Imprivata Bridge Studio enables an IT specialist to build provisioning sequences by “searchlight,” targeting the source application’s controls. This visual wizard approach enables efficient configuration of the application provisioning attributes and hides the underlying scripting complexity associated with connector development. Imprivata Bridge Studio supports more complex capabilities for advanced identities, including support for conditional workflows and shared sequences to help manage movers, leavers, and joiners throughout the organization.

## Bridge playback

Bridge playback enables an IT specialist to test an application connector while still in development. This allows the IT specialist to debug potential issues in the connector ahead of deployment to the production environment. Users can pass test data to the connector to simulate production transactions. Comprehensive debugging capabilities include step-by-step visual sequence execution, breakpoint pausing, and variable inspection.

## Infrastructure investment

The Imprivata Identity Governance architecture includes a scalable and highly available bridge server architecture that enables connectors into hundreds of clinical and business applications, operating systems, networks, and enterprise directories. The bridge server can be seamlessly deployed into the existing IT topology with minimal staff disruption and architectural adjustment.

Imprivata, the digital identity company for healthcare, provides identity, authentication, and access management solutions that are purpose-built to solve healthcare's unique workflow, security, and compliance challenges.
