

Detect insider threats, protect patients, and staff with Imprivata FairWarning

Imprivata FairWarning Patient Privacy Intelligence combined with Drug Diversion Intelligence, provides a multi-faceted approach to protecting patients and the organization. Detect suspicious EMR accesses, and drug diversion risk with Imprivata FairWarning solutions.

Utilizing the power of both Patient Privacy Intelligence and Drug Diversion Intelligence, allows organizations to protect the patient's digital identity, and mitigate potential patient harm through allowing compliance teams to monitor for suspicious EMR record access, and be alerted on potential instances of drug diversion. Together, both solutions help organizations to:

- Detect inappropriate behaviors that are nearly undetectable
- Deliver reliable analytics to drive efficiency and effectiveness
- Prevent incidents to mitigate risk
- Strengthen their compliance posture while helping meet privacy monitoring and drug diversion detection goals

Benefits of combining Imprivata FairWarning Patient Privacy Intelligence and Drug Diversion Intelligence:

EFFICIENT INVESTIGATIONS

Clear explanations for reason behind every EMR access, and the automation of log records to identify drug diversion, allows organizations to quickly respond to risk and launch a full investigation in one location, helping decrease time spent managing this laborious process.

ENSURE COMPLIANCE AND REDUCE RISK

A full EMR auditing and drug diversion monitoring platform can help organizations meet compliance goals within HIPAA and OCR to avoid potential fines, reputational damage, and lawsuits or litigation costs.

ACCURATE VIOLATION DETECTION

Advanced machine learning allows you to pinpoint likely privacy violations and anomalous drug handling behaviors for proactive remediation, identify repeat offenders for targeted remediation and training, and establish accountability from staff.

Key capabilities of Imprivata FairWarning Patient Privacy Intelligence and Drug Diversion Intelligence

ANOMALOUS BEHAVIOR DETECTION

Detect impermissible accesses that would otherwise be undetectable and anomalous drug handling behaviors with AI and behavioral analytics. The AI and behavioral analytics utilized by both Patient Privacy Intelligence and Drug Diversion Intelligence help to eliminate false positives, identify anomalous trends, and scale monitoring programs.

REPORTING

Gain insights into activities within your healthcare system, with standard and custom reporting features that allow organizations to aggregate data in their system for useful information to help understand user behavior, system health, and more. With 100+ out-of-the-box reports, organizations can quickly demonstrate compliance posture and program effectiveness to internal committees or outside regulators.

PRIVACY BY DESIGN

We understand the importance of your patient data and trusting our organization as a business partner. That's why Imprivata FairWarning solutions take the proper privacy and security measures to keep your data protected. We only collect necessary data, enforce least privileged access, and implement strict policies for the security of personal data. FairWarning aligns with frameworks such as ISO 27001 and NIST, and has completed both SOC 2 and ISO 27001 certifications.

OPTIONAL FULLY MANAGED APPLICATION

Imprivata Services (including Professional, Managed, Clinical & Education) helps organizations with implementation of Imprivata solutions, informs and guides technical change management and strategic business planning. They act as a supplemental IT resource, providing hands-on support, training, and remote administration. Benefits of Services include increased return on investment, reduced complexity, accelerated time-to-value, reduced cyber risks and threats, boosted efficiency, precision, and end user satisfaction. Imprivata Services provides tremendous value to any customers using our solutions.

Imprivata is the digital identity company for mission- and life-critical industries, redefining how organizations solve complex workflow, security, and compliance challenges with solutions that protect critical data and applications without workflow disruption. Its platform of interoperable identity, authentication, and access management solutions enables organizations in over 45 countries to fully manage and secure all enterprise and third-party digital identities by establishing trust between people, technology, and information.
