

Optimize your EHR to increase clinician satisfaction, improve patient safety, and drive better return on your EHR investment

Imprivata delivers unique integrations with leading EHRs to improve the user experience, drive adoption, reduce burnout, and optimize the EHR at scale

HR expansion and optimization continues to be a strategic IT investment for many healthcare delivery organizations globally, but getting the most value from your EHR is largely dependent on user adoption. It is critical that IT leadership work closely with clinical leadership to ensure EHR modules and workflows are as efficient as possible for users.

Imprivata helps remove much of the complexity, making the EHR easier to use across a wider set of workflows and modules. Imprivata solutions integrates seamlessly with leading global EHRs to help drive user adoption, enable the use of more EHR capabilities, and reduce clinical burnout, which ultimately increases patient safety, protects PHI, and drives better ROI.

Imprivata helps healthcare organizations get the most value from their EHR investment by:

- Providing fast, secure user access to the EHR as well as allowing for re-authentication for dozens of workflows within the EHR
- Integrating with mobile EHR applications to support bedside care and mobility initiatives
- Giving providers day-one access to the EHR and all the specific modules and workflows they need based on their role
- Supporting electronic prescriptions for controlled substances (EPCS) with a fast and fully compliant workflow
- Monitoring access to patient information to ensure privacy and continuously optimize clinical roles
- Ensuring accurate patient identification to improve patient safety, expedite care, and streamline the revenue cycle process

Imprivata delivers these and other capabilities from a single digital identity platform, purpose-built to solve healthcare's complex workflow, security, and compliance requirements. This reduces total cost of ownership, simplifies ongoing management, and creates a consistent workflow experience for users. Imprivata also offers unmatched expertise in EHR workflows and capabilities across clinical leadership, implementation services, and managed services organizations, helping your organization tailor the solution that will best meet your specific needs to further optimize your EHR.

Start with an Imprivata Clinical Solution Assessment

A clinical solution assessment (CSA) can help you identify how Imprivata can help you optimize your EHR. The CSA provides dedicated clinical professional services to evaluate current workflows to determine where you can improve to expand capabilities and drive value. This provides an easy way to gain awareness of the impact of technology solutions, especially for technical audiences that may have limited contact with clinicians. To get started, contact your Imprivata account team or [learn more about a CSA engagement](#).

Imprivata is the digital identity company for mission- and life-critical industries, redefining how organizations solve complex workflow, security, and compliance challenges with solutions that protect critical data and applications without workflow disruption. Its platform of interoperable identity, authentication, and access management solutions enables organizations in over 45 countries to fully manage and secure all enterprise and third-party digital identities by establishing trust between people, technology, and information.
