Imprivata FairWarning and Imprivata OneSign Integration

To ensure compliance and reduce risk, compliance and privacy teams need visibility into the access of patient information across several applications. Equipped with artificial intelligence, machine learning, and behavioral analytics capabilities, Imprivata FairWarning enables compliance and privacy professionals to protect patient privacy and deliver actionable insights required for investigating, documenting, and reporting potential privacy breaches.

However, monitoring for anomalous behavior can be challenging as user IDs may not be consistent across applications. The One ID experience in Imprivata FairWarning solves this so compliance and privacy professionals can easily understand the highest risk users by using Imprivata OneSign® as the single identity source, as well as a patented Identity Intelligence technology. This delivers a streamlined and detailed view of anomalous user activity across applications without requiring manual aggregation.

Key integration benefits

Visibility of enforced policy violations across the entire application ecosystem | Imprivata FairWarning's One ID combined with Imprivata OneSign integration delivers a consolidated view into user access and anomalous behavior to identify those users at the highest risk for compliance violations.

Increased match rates | Imprivata FairWarning's patented Identity Intelligence enhances the visibility of user identities across supported application ecosystems.

Enhanced user risk scoring via artificial intelligence | Continuous access to the application ecosystem provides the ability to understand and assess risk based upon activity across multiple applications.

Simplified management of user lists across applications in one place | Replaces current requirement to manually manage user lists in each EMR or data source and aggregate information.

Automated approach to continuously update title/ department information for users | Updates user information as they move into new organization roles.
