

DATASHEET

Imprivata Mobile Access Management (formerly Imprivata GroundControl)

Simple, secure and personalized check-out for shared mobile devices

Organizations everywhere are adopting mobile technology. And a corporate-owned shared device approach reduces the initial investment needed in mobile devices, while also supporting data privacy with increased control over who has access to what, when.

Imprivata makes shared devices a reality with Imprivata Mobile Access Management (formerly Imprivata GroundControl), the end-to-end mobile solution that provides organizations a fast, efficient end user workflow, while improving security and supporting IT and mobile teams in managing their fleets.

Imprivata: Frictionless, personalized, and secure shared mobile access

Any device – any app – any workflow – anywhere

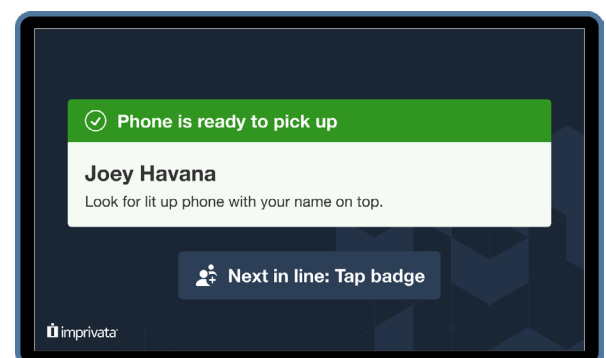

Imprivata Mobile Access Management (MAM) is the only solution to solve the workflow and security challenges of shared devices, without compromise. With Imprivata, organizations can:

Deliver an optimal end user experience

Provide a personalized end user experience without added barriers to use:

- Secure badge-tap authentication assigns devices in under two seconds
- Smart charging prioritizes and identifies the best device for users
- Intuitive displays instruct users on next steps, saving time at check-out and check-in
- Single sign-on streamlines access to mobile apps, saving time and frustration

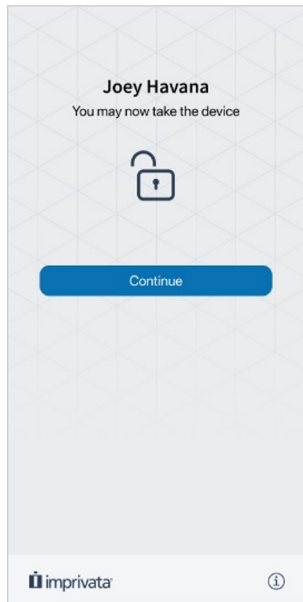

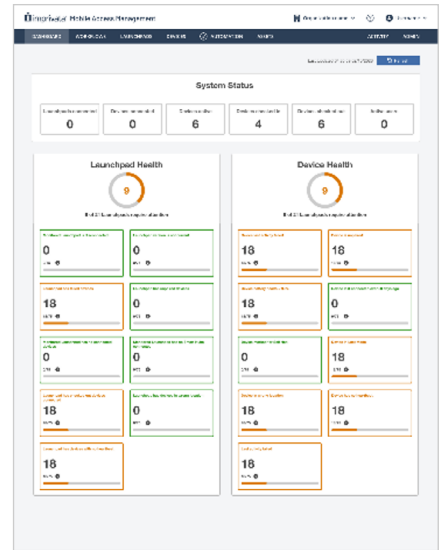

Simplify asset management

Know who had what device, where, and when:

- Port-level visibility lets you know where devices have been returned
- Automated alerts expedite the recovery of misplaced devices before they go missing
- Assignment status lets managers know who has which device, and supports accountability as devices change hands
- Configurable dashboards deliver actionable data such as the state of devices and battery

Improve security and privacy

Secure mobile environments should not come with compromise. Imprivata delivers a simple, secure workflow to promote privacy and security as devices change hands:

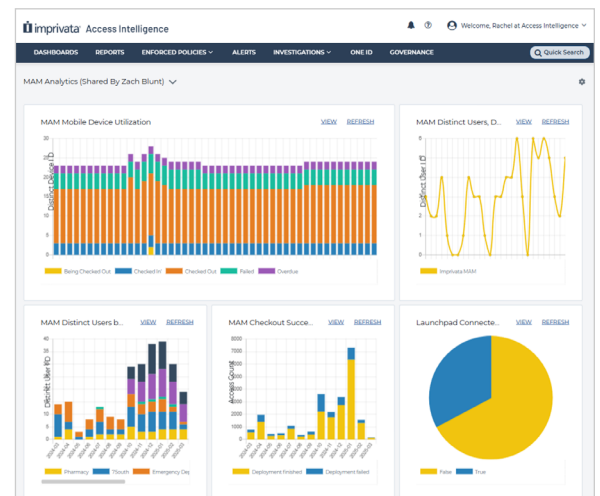

- Remove shared pins and lock down devices between use
- Automatically de-personalize devices after use for increased privacy
- Proactively flag missing and misplaced devices for lost mode

Maximize mobile ROI with robust analytics and actionable alerts

Imprivata Analytics for MAM helps organizations make informed decisions to optimize their mobile strategies and workflows:

- Gain a clear understanding of actual usage data and trends for mobile devices and applications
- Identify opportunities to streamline workflows and eliminate unnecessary device or application expenditures
- Track device and app usage patterns to uncover areas where additional training or support may be needed

Achieve faster time-to-value with dedicated mobile expertise

Imprivata Mobile Managed Services are designed to provide you with immediate, holistic capabilities to manage MAM, enabling your mobile team to focus on other strategic projects and mobile solutions. We curate the right blend of Imprivata and mobile expertise with prescriptive program management to ensure MAM never falls behind.

Imprivata Mobile Access Management

Today's workforce needs flexible, untethered access to tools from anywhere, at any time. MAM drives adoption and useability of shared-use mobile devices by offering a personalized end user experience without added barriers to use. MAM is the only solution to meet the challenges of shared-device environments for both Android and iOS devices. Leverage unrivaled access management to optimize shared iOS and Android devices with secure device checkout, automated device management, and seamless application access using a deep integration with Imprivata Enterprise Access Management.

Schedule a demo, and get a first-hand look at the power of MAM.

Imprivata is the digital identity company for mission- and life-critical industries, redefining how organizations solve complex workflow, security, and compliance challenges with solutions that protect critical data and applications without workflow disruption. Its platform of interoperable identity, authentication, and access management solutions enables organizations in over 45 countries to fully manage and secure all enterprise and third-party digital identities by establishing trust between people, technology, and information.
