

# Simple and Secure **Access Management**

Because every second of critical work should be frictionless and secure

Critical sectors like healthcare and manufacturing, as well as federal, state, and local agencies (including first responders), remain prime targets for cybercriminals.

Organizations in these highly regulated industries continue to invest to mitigate the risk, but often at the expense of user productivity.

**In critical work, seconds can mean the difference between life and death, or the stalled production and delivery of goods and critical services.** Frontline workers need rapid, unobstructed, simple, and secure access to devices, applications, and information.

Current security solutions are not built for the time-sensitive nature of these industries. They are too complicated, manual, and password-driven, hindering access to vital information and reducing productivity. They are also unable to effectively integrate with complex IT environments that consist of legacy and modern applications, shared and personal endpoint devices, and users with multiple roles.

As a result, user productivity suffers. A new approach is needed to ensure that every second of critical work is frictionless and secure.

**It is vital for every second of critical work to be both frictionless *and* secure.**

## The new age of critical work

With Imprivata, say goodbye to security protocols that impede critical work and waste valuable time. Instead, **say hello to simplified and streamlined access management, security, and compliance.** This means giving the right individuals efficient and secure access to the right resources at the right times. This enables optimized patient care and throughput, enhanced production of critical goods and services, and greater control and confidence for IT, security, and compliance teams.

## Why is Imprivata the best solution?

We are optimized for:

### PRODUCTIVITY

Efficiency, ease, and speed

- Fast, frictionless access to vital information
- User-friendly workflows
- Personalized experiences on shared devices

### SECURITY

Confidence, control, and reputation

- Identity-centric access management for all systems and devices, for all types of users
- No security trade-offs or compromises
- Compliance with regulatory requirements

### PERFORMANCE

Reliability, visibility, and trust

- More insights and control of an expanding IT ecosystem
- Greater tech adoption
- Seamless integration with legacy and modern applications

### RETURN ON INVESTMENT

Value, savings, and achievement

- More productive workforce
- Continual ROI from IT investments
- Improved bottom line and enhanced reputation protected from downtime or breaches

Imprivata delivers access management solutions for healthcare and other mission-critical industries to ensure every second of crucial work is both frictionless and secure. Imprivata's platform of innovative, interoperable access management and privileged access security solutions enable organizations to fully manage and secure all enterprise and third-party identities to facilitate seamless user access, protect against internal and external security threats, and reduce total cost of ownership.
