

DATASHEET

Imprivata Mobile solutions and SOTI MobiControl

Connecting shared Android devices with your Enterprise Mobility Management (EMM) for a seamless, secure mobile experience

Imprivata Mobile Access Management (MAM) and Imprivata Mobile Device Access (MDA), integrated with SOTI MobiControl, help organizations securely manage and access shared Android devices. Together, they combine secure access to devices with centralized mobility management, enabling IT teams to streamline deployment, strengthen controls, and improve workflows.

Simplified shared mobile device and access management

Imprivata Mobile solutions and SOTI MobiControl enable IT teams to deploy, configure, and secure shared Android devices while maintaining fast, reliable access for authorized users. Together, the solutions provide:

- Android Enterprise app and enrollment policies for scalable, Work Managed deployment
- Managed AppConfig for Imprivata Locker and MDA settings, including server and device identifiers
- SOTI Lockdown to restrict devices to approved apps and features while supporting Imprivata access workflows
- Centralized device groups, application delivery, and policy assignment across shared device fleets

Stronger security without added IT burden

Imprivata Mobile solutions and SOTI MobiControl work together to enforce a controlled shared-device experience. SOTI Lockdown restricts access to authorized apps and device features, while Imprivata Locker or MDA enables fast, secure access workflows for authorized users.

Scale shared mobility securely and efficiently

Imprivata Mobile solutions integrated with SOTI MobiControl are designed to help organizations scale shared mobile device environments while balancing security requirements and user productivity. By combining streamlined device management with fast, frictionless authentication, IT teams can reduce complexity while users gain reliable, immediate access to the devices and applications they need. The result is a secure, efficient shared mobile environment that supports both operational performance and high-quality user experience.
