

# Top reasons why identity governance matters

## for IT Directors

“After implementing Identity Governance from Imprivata, what used to take 30 minutes to create accounts manually, now takes seconds. That has been a big win for us.”

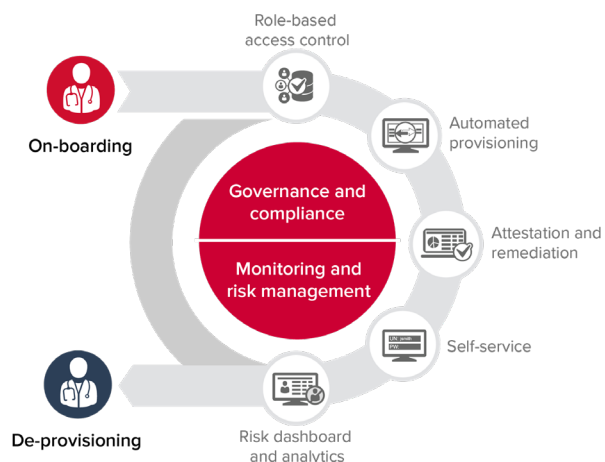

- Ana Agostini,  
Administrative Director - IT Services,  
Memorial Healthcare System

Job turnover is a fact of life in healthcare. Clinicians and hospital workers continuously change positions and move on to other opportunities. Onboarding new hires, managing entitlements, and tracking departing employees, students, contractors, and vendors is a constant struggle for many healthcare IT organizations.

The fix for many IT organizations has been manual processes and internally developed applications – time-consuming, costly, and risky approaches that divert valuable IT resources from more strategic endeavors. Today, IT Directors are turning to healthcare-specific solutions to automate identity governance functions and increase staff productivity.

### Your solution: Imprivata Identity Governance

Imprivata Identity Governance is the leading identity governance and compliance management solution in healthcare, providing fast, secure role-based access to IT systems and applications. The solution automates identity and risk management processes, enables compliance with internal and regulatory guidelines, and allows clinicians to focus on quality patient care on day one.

Identity governance provides unique benefits for each healthcare technology leader.

## Proven benefits

Imprivata Identity Governance can help your organization:

- Simplify operations, save time and money, and free up resources by eliminating manually intensive, error-prone, time-consuming provisioning efforts
- Improve acceptance and increase adoption by enabling business owners to approve access rights to critical services
- Increase IT staff satisfaction and retention by eliminating tedious, repetitive and mundane tasks, while providing clinicians with more efficient access to all of the tools they need to do their jobs
- Reduce risk by introducing role-based access controls that tightly align entitlements with job functions, and by eliminating privilege build-up and orphaned accounts when people change positions

## Next steps

Seeing is believing. Let Imprivata demonstrate the proven benefits of Imprivata Identity Governance. See how automating identity and access management processes can help your organization simplify operations, free up resources and reduce risk.
